

**Amendments to the Specification:**

Please insert the following heading on page 1, between lines 2 and 3:

FIELD OF THE INVENTION

Please insert the following heading on page 1, between lines 5 and 6:

BACKGROUND OF THE INVENTION

Please insert the following heading on page 1, between lines 22 and 23:

SUMMARY OF THE INVENTION

Please amend the paragraph at page 1, line 30 as follows:

Further objects and advantages of the invention will appear from the following specification and claims.

Please insert the following paragraph on page 2, before  
line 1:

According to one aspect of the present invention, a speed governor is provided for a pneumatic high speed motor, wherein the pneumatic high speed motor includes a stator housing, a rotor journaled in the stator housing, and a pressure air inlet passage. The speed governor includes a valve element that is shiftable between an open position and a closed position for controlling pressure air flow through the inlet passage, and a spring which continuously biases the valve element toward the open position. The valve element has an activating surface which is exposed to an output pressure of an air compressor that is driven by the rotor such that the output pressure is responsive to a speed of the rotor. The output pressure of the air compressor generates an activating force, which is responsive to the output pressure, on the activating surface the valve element such that, when the speed of the rotor exceeds a desired operating speed level, the activating force shifts the valve element toward the closed position against the bias force of the spring.

Please amend the paragraph at page 2, line 4 as follows:

~~In the drawings~~ BRIEF DESCRIPTION OF THE DRAWINGS

Please insert the following heading on page 2, between  
lines 11 and 12:

DETAILED DESCRIPTION
